

## Itens de entrega do Trabalho

### 1 - Smart contract - compilando perfeitamente

The screenshot shows the Foundry IDE interface. On the left, the project structure for 'MEDICALREPOSITORY' is displayed, including 'deliveryWork', 'medicalRepository', 'script' (containing 'Deploy.s.sol' and 'Upgrade.s.sol'), 'src' (containing 'IMedicalRecords.sol', 'MedicalRecords.sol', and 'MedicalRecordsV2.sol'), 'test' (containing 'IntegrationFlow.t.sol', 'MedicalRecords.t.sol', and 'MedicalRecordsUpgrade.t.sol'), and various configuration files like '.env', '.env.example', '.gitignore', '.gitmodules', 'foundry.lock', 'foundry.toml', 'README.md', 'SETUP.md', and 'medicalRepository-offchain-app'. On the right, a terminal window shows the command line output of the compilation process:

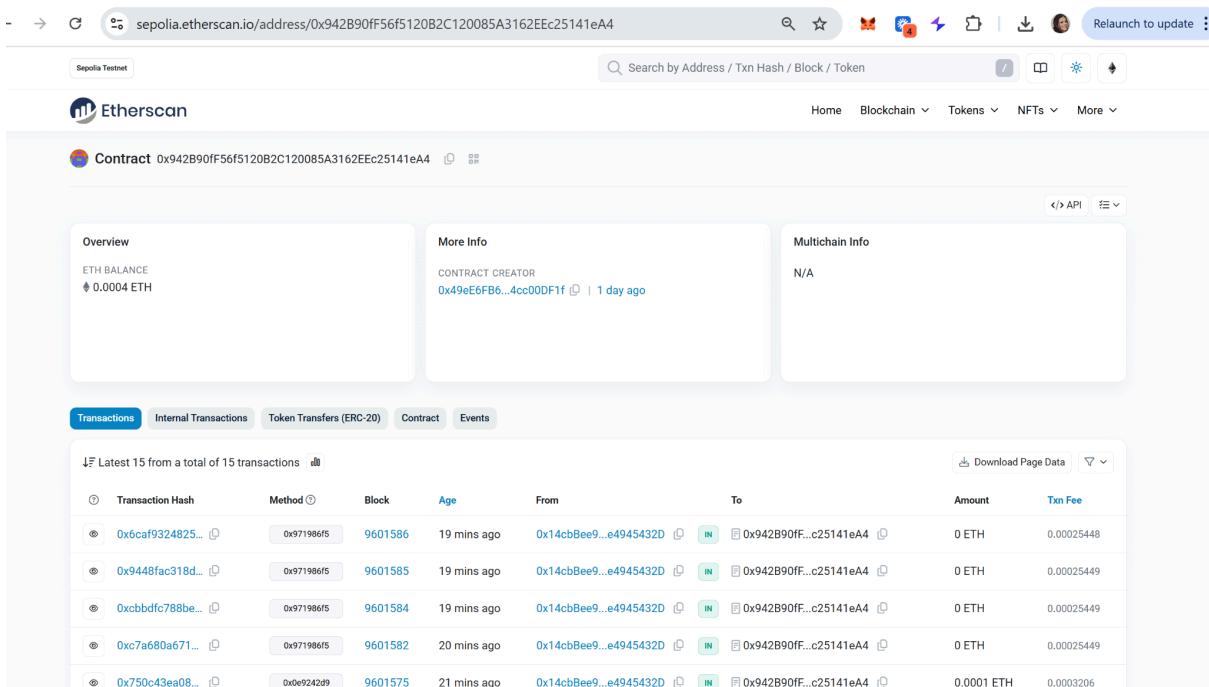

```
f938907..610c272 main -> main
batis@sonia MINGW64 /c/_sonia/dev/projects/medicalRepositoryProject (main)
$ cd medicalRepository
$ forge build
[:] Compiling...
[:] Compiling 4 files with Solc 0.8.20
[:] Solc 0.8.20 finished in 3.84s
Compiler run successful!
batis@sonia MINGW64 /c/_sonia/dev/projects/medicalRepositoryProject/medicalRepository (main)
$ 
```

URL do github: <https://github.com/DevSoniaBatista/medicalRepositoryProject>

Github possui o código do smart contract e do frontend

### 2 - Smart contract deployed

<https://sepolia.etherscan.io/address/0x942B90fF56f5120B2C120085A3162EEc25141eA4>

The screenshot shows the Etherscan interface for the deployed smart contract. At the top, it displays the address: 0x942B90fF56f5120B2C120085A3162EEc25141eA4. Below this, there are three main sections: 'Overview' (ETH BALANCE: 0.0004 ETH), 'More Info' (CONTRACT CREATOR: 0x49eE6FB6...4cc00DF1f | 1 day ago), and 'Multichain Info' (N/A). At the bottom, there are tabs for 'Transactions', 'Internal Transactions', 'Token Transfers (ERC-20)', 'Contract', and 'Events'. The 'Transactions' tab is selected, showing a table of the latest 15 transactions from the total of 15. The table includes columns for Transaction Hash, Method, Block, Age, From, To, Amount, and Txn Fee.

Transaction Hash	Method	Block	Age	From	To	Amount	Txn Fee
0x6caf9324825...		9601586	19 mins ago	0x14cbBee9...e4945432D	0x942B90fF...c25141eA4	0 ETH	0.00025448
